ABOUT THE COMMITTEE

The TX Fast Track Employer Committee is a group of local manufacturing companies and industry leaders working together to strengthen Bexar County's workforce.

The main goal is to ensure the TX Fast Track program produces highly skilled, job-ready graduates who meet the real needs of today's manufacturing employers. By partnering directly with the program, the committee helps shape training to match current industry demands.

This means students are not only prepared for entry-level maintenance technician roles but are also equipped to grow and adapt as technology and industry needs evolve.

For employers, the committee offers valuable benefits, like early access to a pool of well-trained candidates, chances to participate in mock interviews and plant tours, and opportunities to upskill their current workforce.

Located in San Antonio, Texas, the company specializes in producing automotive interiors. The name "Avanzar," meaning "to move forward" in Spanish, reflects the company's commitment to continuous improvement.
